

UNDP Data Portal: Data Preparation Workflow (in Tableau Prep), June 2020

SOURCE
DATA

INPUT
Raw data downloaded from third-party websites or provided by UNDP. One file per indicator.

Data TRANSFORMATION:

- calculations
- pivoting
- aggregation
- filtering
- ...

Data CONSOLIDATION:

- Output a csv file for each topic area
- Each topic area has one or more stories
- Each story uses data from one or multiple columns
- remove duplicates
- ...

OUTPUT

- Generate a CSV file for each topic area.
- Upload the CSV files to Google Drive (Phase 1) or Azure Data Warehouse (Phase 2)
